## WILL BECOME A COPPER CAMP

ally of Sierra Madre.

DISTRICT IS NEAR OGDEN.

Metallurgist Believes Some of the Largest Mines in the State Will Be Developed There.

light this week; altogether 147,633 gist and metallurgist, has expressed the the sum of \$78,763.50. The market has ago, that some of the largest copper mountains north of Ogden.

Mr. Maguire has been managing a demand, at practically stationary fig- | years and he is getting to the point where the development is getting interesting. During the time that he has been interested in this region he has displayed little ostentation, but has gone mong in a quiet easy manner; but with the profoundest confidence that the district would become an important pro-

ducer of mineral.

Owing to the deep snows which fill the canyons and gorges the camp is in-accessable in the winter, at least with-out some difficulty, and for that reason little work has been carried on there during the frigid season of the year; but with summer here again activity is the order of the day at the Boston, Maghera, Midland, Santa Maria, North-land, Prince of India, and Boilermaker

To many Utah mining men little Is known of this extensive mineral bearing country. There are some who have never even heard of it; others may have done so, but thought it of little con-In a contribution to the Salt Lake Mining Review recently Mr. Maguire gave a description of this interesting district, which contained the following:

"Comprising a part each of Boxelder, Weber and Cache countles in northern Utab, ites a very extensive mineral-bearing country, which has hitherto at-tracted but limited attention. Its west-ern border extends down to the western base of the Wasatch range, of which Sierra Madre mountain constitutes a part, and where we find in the old syenite and schistose measures the Prince of India, Maximilian, Emma Nevada, Boston, Maghera, Santa Maria, Mexican and other groups of mines which lie in the old formation, and higher up toward the summit we find the Eldorado, Cashling, Vulture, Uwanta, Devil's Neck and other groups, in which silver, lead and copper abound, while only gold and copper exist near the base of the

show quartzite of the cambrian age and above this the silurian limestones and clay shales capped by an extraordinary measure of quartz, which looks as though it might have been thrown up from a tremendous assure in the lime, slate and syenite, through all of which the great Eldorado assure passes from east to west. This mineral bearing axis crossing Eldorado peak, strikes north-eastward through a spur or saddle-like mountain ,which separates Cache valley from Ogden vailey. tends forward in an easterly direction for about 27 miles, being prominent by a series of fissures that exist in the por-

phyry, slate and quartzites that consti-tute the formation of this extensive country. "The area of this part of Utah so mineralized is about 25 miles in extent Well toward its eastern limit we reach La Plata where phenomenal masses float silver-bearing lead ores, are found in the drift which covers a series of low imestone hills and what is known as a Platta basin. In this same locality veins come to the surface in which high grade copper ores are very prominent Strange as it may seem, hitherto very little work has been done at La Plats and no work done upon the extensive series of veins that are found to the westward in the quartzite and porphyry measures extending from the high La Plata plain down into Ogden valley and cross the Wasatch range to the Eldo rado mine and its associates on that

## MINES IN THE

Drifting In Progress on the 1500 Level of the Raymond.

CAMP OF TINTIC

AT THE EAGLE & BLUE BELL

Singham Consolidated Has Expended \$25,000 in Development There Other Notes From Camp.

Special Correspondence. Eureka, July 11, 1903, - Work opinion, while in the city a few days at the Raymond mine, just north mines in the state will be developed in | the drift from the 1,500-foot level, and been down. Lower Mammoth was the Sierra Madre mining district, which the showing is promising. No less again the principal trader of the week, is located in the Wasatch range of than \$100,000 has already been expended on development work and Manager J. C. Sullivan and Senator Kearns, the number of properties there for several principal shareholders, are confident that they will soon have a dividend payer, which means much for the north

> John H. McChrystal returned from Salt Lake City last night where went on business connected with the option given to the Bingham Cons. company and by the Eagle & Blue Bell Mining company, the terms of which calls for a second payment on the option before Aug. 20, and the third payment to be made on or before Dec. 20 The transfer of the property will probably be consummated early in January, 1904. The mine has never looked so well as at present and the outlook for the future is still brighter. In the pas four months the Bingham Cons.

has expended in the neighborhood of \$25,000 in development work. There is a large amount of rich ore in sight and operations and showing at the prop-At a depth of 850 feet from the top

of the shaft in the South Swansea mine a cross cut he s been started for the vein. After extending the cut about 20 feet some fine silver-lead ore and considerable iron was encountered. Everything at the property is in a flourishing condition. Sinking of the shaft will be continued and stoping will Owing to the closing down of the

mines for several days, to allow the miners time to celebrate Independence day, the shipments for the week were very small, only 53 cars of ore, the same being sent out by the following Bullion-Beck 6, Black Jack 11, Centennial-Eureka 18, Grand Central 6, Gemini 6, Lower Mammoth 1, Mam-

A conference was had between the officials of the Copper company and those of the Bingham Copper Belt radecho from behind the closed doors brought the information that the officers of the two companiese were fixing NEW FINANCE AND OLD-FASHIONED HONESTY; SOME TRITE AND POTENT OBSERVATIONS.

The following from the Financier of New York on "New Finance and Old-Fashioned Honesty" is exceedingly well written and could hardly be improved except to add emphasis or to amend the title which might set in clearer light the distinction between honesty and trickery. New finance is full of tricks, full of pretence, full of dishonesty, and the marvel is that legislation does not provide a punishment, if not a remedy, for the rascalities of the present era of finance. Or do financial interests dictate legislation? But to the article:

The new finance, so-called, has much to answer for. It is responsible for a distinct lowering of the moral code of the nation, and its effects are bound to react on American life in years to come. The marvelous period of prosperity with which we are so familiar has been made the excuse for operations which in times past would have been denounced in plain English as differing only technically from the crime of larceny. The country, in short, has been going through an attack of money madness. It must suffer the consequences. The trust movement, while at the bottom sound and logical in its aims, has been made the excuse for the most reckless exploitation of unsound propositions ever known in financial history. The promoters of some of these schemes, from all appearances, have come to the end of their resources. "Once bitten, twice shy," an aphorism often quoted, explains the collapse of many of the financial sir bubbles seductively dangled before the American investor since the business revival of 1897-1898. Amalgamated Copper, subscribed many times over at par and above, is no longer regarded as tempting even at half the price of the highest quotation. United States Steel, despite' the adroit manipulation of the keenest financial intellects of the century, falls persistently in stock exchange quotations, and other trust stocks show a similar limpness. Why? Simply because the conservative people of the country are afraid of them. They do not know absolutely that they are honest, and the taint of stolen goods clings to a stock, even in the hands of innocent purchasers. "Sow the wind and reap the whirlwind," is as true today as when first uttered.

The moral health of the nation is not benefited by sharp practises, and as surely as action and reaction are equal, there is bound to follow on the heels of this wave of cupidity which overrides the moral code a train of evils not pleasant to contemplate. Old-fashioned honesty and integrity cannot be cast out of the curriculum of life. Human nature is not elevated by the temporary abandonment of either of them, It is all right to be ambitious, to overflow with a desire to achieve things, but at the same time reflection will show, and experience teaches that out of evil good cannot come. Rome fell because of the insane cupidity of her senators, and her wealth disappeared forever. The United States cannot be compared with Rome, but the United States is sowing some very dangerous seed just now, and her leading men in many walks are setting an example which cannot have other than a most dangerous tendency. The gospel of old-fashioned honesty certainly needs a few earnest advocates at this, the opening of the new

It was stated that by the end of an-other week the Copper Belt Railway company will be ready to employ from its proposed extensions.

ORES FROM TONOPAH. Returns from the Initial Belcher Shipment Received. Charles E. Hudson, who, with other

Sait Lake Parties, are interested in the Tonopah-Beicher mine near Tonopah, has received returns from the initial shipment of 25 tons of ore. With every-thing but the freight deducted the pro-duct brought \$41.50 per ton. Encouraging reports continue to come from this property and Mr. Hudson says while the shaft at the new discov-

says while the shart at the new discovery was down only eight feet when the last letter was dispatched from the mine, it shows a width of about 12 feet, four of which is shipping product, the same going \$65 to the ton.

The second car load is enroute and a force of men is engaged at the mine in sacking ore preparatory to further shipments. If teams can be obtained to haul the ore to Sodaville, 10 cars, Mr. Hudson, stated, will be dispatched be

fore another month expires. Notes from Bingham.

Work is to begin at once to prove up apex of vein on the ground in dispute between the Utah and Highland Boy 'onsolidated companies. When the Mascot tunnel has been completed to the Dalton & Lark shaft t will have exactly the same length as the present length of the Butterfield tunnel-8,200 feet.

D. C. Jackling, the builder and suc-cessful operator of the Golden Gate mill at Mercur, says that by substitut-ing electricity from the Telluride Powr company for steam he saved 50 cents ton in cost of mining and reduction. Thus, handling 1,000 tons of ore daily, company reduced expenses over

\$180,000 in a single year.
On the 5th the last of a 45-ton lot of re and concentrates were hauled from the Nast mine to depot. It included 25 tons of firstclass lead ore and 5 tons carrying a good per cent of copper. The concentrates (15 tons), were jiggings made on the dump and way up

MARKET RALLIED A LITTLE

On the Appearance of the Bank State ment-Close, Weak, Active Near The Lowest.

New York, July 11 .- A resumption of the liquidation in New York Central caused precipitate decimes all around dur ing the first half hour, in which somof the standard stocks sold well below the previous lowest prices of the year, not ably St. Paul, Pennsylvania, Southern Pacific and New York Central. Offerings were on a very large scale all through the list, but there was a pause in the selling after 19:30 o'clock, and prices hardened slightly. Declines reached 3% in New York Central, that stock touching 115½, and 1 to 2 points in active stocks generally, except the United States Steel stocks, which met support. Some large buying of Reading was also in evidence and Southern Facilic reacted a point. The market rallied upon the bank statement, New York Central, St. Paul and Missari, Pacific rising a point, but selling was renewed in increased volume and prices broke through the previous bottoms. New York Central fell an extreme 4½, St. Paul 3½, Pennsylvania and Amalgamated about 2 and some inactive stocks showed greater losses. Lackawanna dropped 6. A few railies were not well and and the closing was active and weak, and near the lowest. were on a very large scale all through

CHICAGO WHEAT.

Chicago, July II.—September wheat op-ened 1s to 1s lower, at 731s to 787s, and after selling up to 781s/91s, declined to 787s. Washington's Wheat Crop.

Tacoma. Wash., July 11.—Estimates made by three of the principal exporters of Tacoma place the wheat crop of the state of Washing'n this year at 2,000,000 bushels and one of them thinks it may so to 22,000,000 bushels or about the same as last year. They base their estimates on the increased acreage, coupled with reports from various sections of the wheat belt.

WOOL. ST. LOUIS.

St. Louis, July 11.-Wool steady: terri tory and western mredium, 16@18; fin-medium, 14@15½; fine, 13@15½.

LONDON WOOL AUCTION. LONDON WOOL AUCTION.

London, July 19.—The offerings at the wool auction sales today numbered 13,541 bales, mainly crossbreds. Fine Merinos were steady, but heavy grades showed a decline of 5 per cent. Scoured sold freely to the home trade and Germany, faulty at a decline of 5 per cent. Fine Cape of Good Hope and Natal was in fair demand. Faulty snow whites were 1-d cheaper. Punta Arena grades in active demand and sold well to France and Germany at 1-20/2 advance. WANTED.

Distribution of Merchandise Acceler-

ated-There is an Excessive Demand for Farm Hands. New York, July 10 .- R. W. Dun & Co.'s Weekly Review of Trade tomorrow will say: "Business responds to improved conditions. Distribution of merchandise is occelerated by more seasonable weather

wholesale and jobbing trade, especially at the interior, shows the encouraging effect of brighter agricultural prospects. "There is the customary excessive denand for farm hands. Receipts of holiday traffic and trade in holiday goods indicate no diminution in purchasing power, and semi-annual inventories show er, and semi-annual inventories show a more gratifying situation than expected.

"There is less than the usual midsummer idleness in manufacturing, except in the cotton industry.

"Commodity prices advanced slightly during June, Dun's Index Number on July 1 being \$39,556, compared with \$58,955 a month earlier. July 1 being \$20,400, compared with value a month earlier.

"A decline of 2.4 per cent is recorded in comparison with July, 1902, chiefly in articles of food. Rallway earnings for June are 13.1 per cent larger than last year and 25.3 in excess of 1901.

"Installation of new converters and other repairs interfere with work at some prominent steel mills, which explains in

prominent steel mills, which explains is part the quiet condition of the market. "Raw wool is thrmly held, fair prices being secured at the London American auction sales. "Failures this week numbered 194 in the nited States, against 193 last year, and in Canada, compared with 19 a year

SUGAR AND JOBBERS. Competition So Strong as to Almost

Demoralize Business Locally. The competition for trade among the

jobbers of sugar is becoming more spirited and has reached a point where the retailers declare that line of business is completely demoralized. They also say that no one is being benefitted by the cut in prices, but the con-

sumers, and only such of those as have spot cash. These sales they state are made at a loss by the retailers who in addition miss making a profit from the most desirable class of buyers. Sugar is sold to retailers at about \$5.60 per hundred, and this is retailed at \$5.75, a seeming profit of fifteen cents, but as it costs nearly ten per cent of the cost of the commodity to handle it, there is in reality a loss of about 40 cents on each 100 pounds handled on this base. The present low prices to both retail merchant and customers is on a strictly C. O. D. system, regardless to the transaction, and all those who do not pay the cash are the object of discrimination to an extent far greater than the usual difference between credit and cash. There are no indications in sight for a cessation of hostilities between the contentious jobbers. Of course, all this does not affect the refineries, who receive a uniform price
